Alexandria, VA 22313-1450

Sir:

RESPONSE

This paper is in response to the Examiner's restriction requirement mailed July 2, 2003.

The Examiner has restricted the application to one of the following inventions.

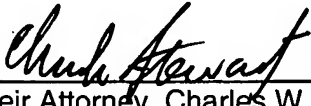

- Group I. Claims 1-18, drawn to a catalyst composition, classified in class 502, subclass 232+.
- Group II. Claims 19-20, drawn to a process for removing arsenic from a petroleum fraction, classified in class 208, subclass 251R.

Applicant hereby provisionally elects, with traverse, to prosecute the claims of Group I, claims 1-18.

Applicant respectfully requests the Examiner to use her discretion as permitted under 35 U.S.C. § 121 and withdraw the restriction requirement. It is submitted that there will be no additional burden to the Examiner to examine both Groups of claims; because, a patentability search for one Group of claims will necessarily entail a search of the same art areas as for the other Group of claims.

Respectfully submitted,

OPINDER K. BHAN
